-
- Immunotherapy: a promising era in cancer management
-

It has always been our belief that bringing the global knowledge to home is best done through the courageous Egyptian scientists, who are working in different countries around the world. Immigrant Egyptian brains are the best-qualified ambassadors to help us achieve the progress we need at home. We need to continue to work with vision, new concepts and according to the up-to date international standards.

The expected fruitful advice and cooperation is the core of this meeting, as we strongly believe that immigrant Egyptian brains are the ones, to be able to provide this without self-interest and with love. There are examples of so many great world class Egyptians, who have proved this many times and made great impact on Egypt.

These eminent Egyptian experts will attend this forum, to brainstorm and discuss with us, how we can best cooperate together for the benefit of all Egyptian citizens and for the field of Oncology in Egypt. This interaction aims at providing our country the best possible advices to broaden the vision for today's rising cancer alerts in the country and to share ideas across various cancer disciplines as well.

Secretary General

Prof. Ibtessam Saadeldin

President

Prof. Hussein Khaled

Members of Scientific Committee

Amr Fergany (USA)	Hazem Elakad	May Abdel Wahab (Austria)	Olaa Khorshid
Abbas Omar	Heba ElZawahry	Medhat Elsebaie	Omar Fahmy
